

## Notes Compound Interest 19/05/2020

We can derive general formula for calculating compound interest in various cases, as given below. It is very easy to calculate compound interest by using formula.

Case 1. When the interest is compounded annually.

$$A = P \left(1 + \frac{R}{100}\right)^n$$

where, A = Amount

P = Principal

R = Rate

n = Time

### Compound

Compound Interest (C.I) = Amount - Principal.

$$\Rightarrow \boxed{C.I = A - P}$$

Q. Find the amount of Rs 8000 for 3 years, compounded annually at 10% per annum. Also find the compound interest.

Sol<sup>n</sup>:

P = Rs 8000	}	given
Time = 3 years		
Rate = 10%		
A = ?		
C.I = ?		

Class: XII Commerce

Subject: Business Studies

Chapter: 4 Planning

Topic: Features of Planning

\* The following features of Planning.

1. Planning focuses on achieving objectives.
2. Planning is a primary function of management.
3. Planning is Pervasive.
4. Planning is a Continuous process.
5. Planning aims to look into future.
6. Planning involves Decision making.
7. Planning is a mental exercise.

How

Q. Discuss every points of Planning in your words.

Q. Describe importance of Planning?  
(Read N.C.E.R.T. book).

## Notes Surface Area & Volumes 15 05 2020

- Q Find  $i)$  the lateral or curved surface area of a closed cylindrical petrol storage tank that is 4.2 m in diameter and 4.5 m high.  
 $ii)$  how much steel was actually used, if  $\frac{1}{12}$  of the steel actually used was wasted in making the tank.

Sol<sup>n</sup>:  $i)$  Diameter = 4.2 m

$$\text{radius} = \frac{D}{2} = \frac{4.2}{2} = 2.1 \text{ m}$$

$$\text{height} = 4.5 \text{ m}$$

$$\begin{aligned} \text{L.S.A / C.S.A Cylinder} &= 2\pi r h \\ &= 2 \times \frac{22}{7} \times \frac{4.2}{2} \times \frac{4.5}{1} \\ &= \frac{66 \times 9}{10} \\ &= 59.4 \text{ m}^2 \end{aligned}$$

$\therefore$  C.S.A of tank is  $59.4 \text{ m}^2$

$ii)$  T.S.A of tank =  $2\pi r (r + h)$

$$= 2 \times \frac{22}{7} \times 2.1 (2.1 + 4.5)$$

$$= 2 \times \frac{22}{7} \times \frac{21}{10} \times \frac{66}{10}$$

$$= 87.12 \text{ m}^2$$

Let  $x \text{ m}^2$  actually used in making a tank

then wasted steel =  $\frac{1}{12} x = \frac{x}{12}$

$$\therefore x - \frac{x}{12} = 87.12$$

Sub: Math

Shalaboli Public School

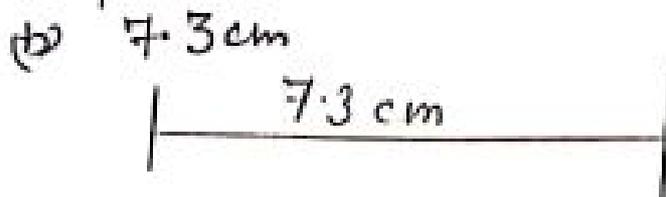

Date: 15.05.2020

Class III A/B

Le: 4. Long and Short

Q1: Draw line segments of the following length.

eg:

(c) 8.4 cm (d) 4.5 cm (e) 2.8 cm (f) 5.3 cm.

Q2: Measure the length of the following things. —

(1) Eraser (2) Pencil (3) Note book.

(4) Pen. (5) Maths book.

Q3: Conversions:

↳ To convert metres into centimetres, put two zeroes after the number of metres:—

eg:  $2\text{ m} = 2 \times 100 = 200\text{ cm}$ .

(We know that  $1\text{ m} = 100\text{ cm}$ )

eg:  $3\text{ m} = 3 \times 100 = 300\text{ cm}$

Now, you solve it.

(1) 4 m (2) 6 m (3) 9 m (4) 5 m.

Sub: EVS

Class: II A/B

Date: 15.05.2020

Q. 5 - Celebrations in the family.

Q1 - Write the places of worship of the following religions:

Religions name	Worship places.
(1) Muslims	—
(2) Hindus	—
(3) Christians	—
(4) Sikhs	—

Q2 - Rearrange the following words to get the name of festivals.

- eg: (a) IPWLIA - DIWALI (b) DI + I
- (b) IOLH - \_\_\_\_\_ (d) HUCRASED - \_\_\_\_\_
- (c) BUAGURPAR - \_\_\_\_\_

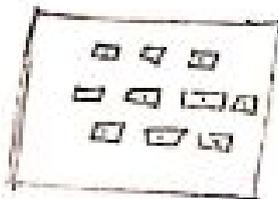

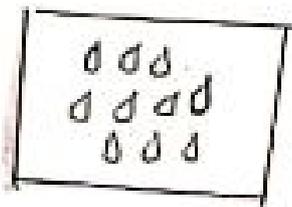

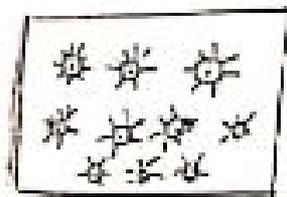

Q3 - Answer the following questions

(1) When do you celebrate Christmas?

(2) Who do people worship in Diwali?

le-4: Counting in tens

Kanak likes collecting different kinds of bindis.

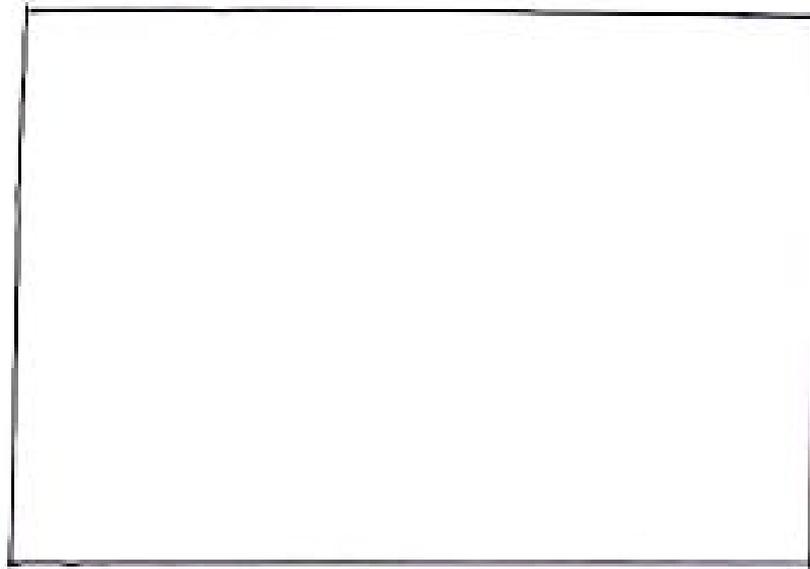

✿ How many packets does she have?

✿ So how many bindis in all?

Each packet has  $3+4+3$  bindis.

Now you draw 10 bindis in a different way.

Class - III A & B

Lesson no. IV  
Lesson name: Sea Song

15/05/20

Subject :- English

Q1. Remember this poem.

Sea Song

I found a shell, a curly one,  
Lying on the sand.  
I pick it up and took it home,  
Cold inside my hand.  
Mummy looked at it and then  
She held it to my ear,  
And from the shell there came a song -  
Soft and sweet and clear.  
I was surprised - I listened hard,  
But it was really true.  
I wish you'd find a nice big shell  
And hear it singing too!

Q2:- Write the opposite words of the following words.

Found :-

Hard :-

Inside :-

Took :-

Big :-

Came :-

Q3. Define 'noun' with example.

Q4. Write one page writing.

Zaunham Masood

1403  
15/05/20

विषय: हिन्दी

पठक का नाम :- 'दोस्त की मदद'

प्रश्न 1) कूहानी को ध्यान से पढ़ें और कहानी से 20 काठन शब्द चुन कर लिखें।

प्रश्न 2) बताओ इनके लिए क्या कहेंगे।

- जो तेज भागता है।  
वह तेज की तरह भागता है।
- जो बहुत अच्छा तैरता है।  
वह तेज की तरह तैरता है।

प्रश्न 3) मात्राएँ लगाकर शब्द लिखें, उदाहरण देखें।

आ (I) नाम काम आ (=)

ई (I) ई (P)

ऊ (2) ऊ (2)

ए (1) ए (3)

ओ (1) ओ (2)

प्रश्न 4) एक पेज सुलेख लिखें।

Taufiqur Rahman

110  
157 = 5/20

Class - II A & B

15/05/20

Subject :- English

Lesson no: 02

Lesson name: 'I Smile'

Q1:- Answer the following questions:

- (a) Why is a smile funny thing?
- (b) What happens when you smile at someone?

Q2:- Write the rhyming words of the following:

Trunk :-

Tunk :-

Think :-

Burn :-

Sat :-

Met :-

Line :-

Q3:- Some nouns are given below. Write them in proper column.

cow	lady	uncle	washerman
horse	aunt	queen	peacock

Masculine

Feminine

Q4:- Write one page writing.

Zabihon Masood.

Hint

میلے کی میری  
 فرح اور عادل اپنے والد کے ساتھ میلے میں گئے۔ پہلے گول گول گھومنے والے جھولے میں بیٹھے  
 دوسرے جھولے میں بیٹھے۔ وہ بھی گول گول  
 گھومتا تھا مگر اوپر نیچے بھی ہوتا تھا۔ فرح اور عادل اوپر گئے تو انھیں  
 بہت ڈر لگا۔ نیچے دیکھا تو سب چیزیں بہت چھوٹی لگ رہیں تھیں  
 اپنے والد انھیں دیکھ کر ہاتھ پلا رہے تھے۔ اور ایہ کیا آت جھولا نیچے  
 آ رہا تھا۔ بہت میں گدگدی ہونے لگی۔ دونوں بیس رہے تھے۔  
 انھوں نے وہاں آٹس کریم کھائی اور گھر واپس آ گئے۔

سوال ۱۔ دوسرا جھولا کیسے کیسے گھومتا تھا؟

جواب :-

سوال ۲۔ جب جھولا اوپر سے نیچے آیا تو فرح اور عادل نے کیا محسوس  
 کیا؟

جواب :-

سوال ۳۔ خالی جگہ میں صحیح لفظ لکھیے۔

۱۔ فرح اور عادل اپنے والد کے ساتھ میلے میں

۲۔ پہلے گول گول گھومنے والے جھولے میں

۳۔ اوپر گئے تو انھیں بہت ڈر

۴۔ نیچے دیکھا تو سب چیزیں بہت چھوٹی لگ رہی

۵۔ آٹس کریم کھائی اور گھر واپس

سوال ۴۔ خوش خط لکھیے۔

راج ڈاک وزن دال ذات

کسی باغ میں آم کا ایک درخت تھا۔ اس کی ایک شاخ پر چڑیا رہتی تھی۔ چڑیا کے دو خولہبورت ننھے ننھے منے بچے تھے۔ اس درخت کی دوسری شاخ پر ایک کوڑے نے بھی اپنا گھونسلہ بنا رکھا تھا۔ کوڑا اپنے گھونسلے میں اکیلا رہتا تھا۔ لیکن رفتہ رفتہ کوڑے اور چڑیا میں بڑی دوستی تھی۔ کوڑا اس کے بچوں کی نگرانی کرتا۔ کوڑا باہر جاتا، تو چڑیا اس کے گھونسلے کی دیکھ بھال کرتی۔

ایک دن کوڑا بیمار ہو گیا اور کھانے کی تلاش میں باہر نہ سکا۔ اس نے چڑیا سے کہا جی چڑیا! جب تم اپنے بچوں کے لیے دانے کی تلاش میں جاؤ تو کچھ میرے لیے بھی لینی آنا۔

سوال 1: کوڑے اور چڑیا کی اس کہانی کو اپنے الفاظ میں لکھیے۔

H.W 1

سوال 2: ہر ایک جانور کے سامنے اس کی آواز لکھیے۔

H.W 2

سوال 3: لفظوں کو جملوں میں استعمال کیجیے۔

Notes Surface Area + Volume

15.05.2020

Q. A soft drink is available in two packs -  
 is a tin can with a rectangular base of length  
 5 cm and width 4 cm, having a height of 15 cm  
 and is a plastic cylinder with circular base  
 of diameter 7 cm and height 10 cm. Which  
 container has greater capacity and by  
 how much?

Sol: i) For tin

$$l = 5 \text{ cm}$$

$$b = 4 \text{ cm}$$

$$h = 15 \text{ cm}$$

$$\text{Volume of tin} = l \times b \times h$$

$$= 5 \times 4 \times 15 = 300 \text{ cm}^3$$

\* The tin has  
 cuboidal  
 shape.

ii) For a plastic cylinder

$$\text{Diameter} = 7 \text{ cm}$$

$$r = \frac{d}{2} = \frac{7}{2} \text{ cm}$$

$$\text{height} = 10 \text{ cm}$$

$$\text{Volume of cylinder} = \pi r^2 h$$

$$= \frac{22}{7} \times \left(\frac{7}{2}\right)^2 \times 10$$

$$= \frac{22}{7} \times \frac{49}{4} \times 10$$

$$= 385 \text{ cm}^3$$

Notes Compound Interest

15 05 2020

Case II when the interest is compounded annually but rates are different different years.

Let principal = Rs P, time = 2 years, and  
 let the rates of interest be  $P\%$  p.a during first year and  $Q\%$  p.a during the second year.

$$\therefore \text{Amount after 2 years} = P \left(1 + \frac{P}{100}\right) \left(1 + \frac{Q}{100}\right)$$

Q Find the amount of Rs 50,000 after 2 years compounded annually the rate interest being  $8\%$  p.a. during the first year and  $9\%$  p.a. during second year. Also, find the compound interest.

Sol<sup>n</sup>: ~~P = Rs 50,000~~ Given

Principal = Rs 50,000

$P = 8\%$  p.a and  $Q = 9\%$  p.a

time = 2 years

$$\text{Amount after 2 years} = P \left(1 + \frac{P}{100}\right) \left(1 + \frac{Q}{100}\right)$$

$$= 50,000 \left(1 + \frac{8}{100}\right) \left(1 + \frac{9}{100}\right)$$

Notes

15.01.2020

∴ A plastic cylinder has greater capacity than tin container.

$$\begin{aligned} \text{Difference in capacity} &= (325 - 240) \text{ cm}^3 \\ &= \underline{\underline{85 \text{ cm}^3 \text{ Ans}}} \end{aligned}$$

H.W

Q. The inner diameter of a cylindrical wooden pipe is 24 cm and its outer diameter is 28 cm. The length of the pipe is 35 cm. Find the mass of pipe if  $1 \text{ cm}^3$  of wood has a mass of 0.6 g.

Q. The capacity of a closed cylindrical vessel of height 1 m is 15.4 litres. How many square metres of metal sheet would be needed to make it?

Q Write and remember so all formula of cube, cuboid and cylinder.

Notes

13 of 2014

Ex. 2

$$\textcircled{1} \quad 3\frac{1}{2} - 5\frac{1}{4} - 3\frac{1}{3}$$

$$= \frac{7}{2} - \frac{21}{4} - \frac{10}{3}$$

$$= \frac{42 - 63 - 40}{12}$$

$$= \frac{42 - 103}{12}$$

$$= \frac{61}{12} = 5\frac{1}{12} \quad \underline{\text{Ans}}$$

M.Q.

$$\textcircled{1} \quad -5\frac{1}{3} + \frac{2}{4} - 4\frac{1}{2}$$

$$\textcircled{2} \quad -6\frac{1}{2} + 3\frac{1}{4} - 3\frac{1}{3}$$

$$\textcircled{3} \quad 5 - 2\frac{1}{3} - 6\frac{1}{4} - 5$$

Notes

15 of

$$= 50000 \left(1 + \frac{2}{25}\right) \left(1 + \frac{9}{100}\right)$$

$$= 50000 \left(\frac{25+2}{25}\right) \left(\frac{100+9}{100}\right)$$

$$= 50000 \times \frac{27}{25} \times \frac{109}{100}$$

$$= \text{Rs } (540 \times 109)$$

$$= \text{Rs } 58,860$$

∴ Amount after 2 years = Rs 58,860

And Compound interest = 58,860 - 50,000  
= ~~886~~ Rs 8,860

Q A car is purchased for Rs 348000. Its value depreciates at 10% per annum during the first year and at 20% per annum during the second year. What will be its value after 2 years?

Q To remember all formulae of Compound Interest.

They may scream when touched. They may recoil from the ~~door~~ textures or ~~the~~ under the table. They may scream when touched. They may recoil from the textures of certain foods. But others seem unresponsive to anything around them. They may fail to respond to extreme heat or cold or even pain.

Many children with sensory processing disorders start out as fussy babies who become anxious as they grow older. These kids often don't handle change well. They may frequently have tantrums or have meltdowns.

causes of sensory processing disorder

The exact cause of sensory processing problems has been identified. All other experiments have shown that children with sensory processing problems will continue to respond strongly to a sticker on the hand or a loud sound, while other children quickly get used to the sensations.

1. Genetics - children born to adults who have Autism, Aspergers, PDD, or other spectrum disorders (which are neurologically based too) are at higher risk for developing SPD.

2. Abnormal brain activity - children with sensory processing problems have abnormal brain activity when they are simultaneously
